

Electrical Engineer

Job Outline

As Electrical Engineer, you will become part of our technology development team working on our cutting-edge tidal turbine technology, being responsible for overseeing and development of the electrical design, SCADA system, PLC's and testing components including several related sub-systems.

About Tocardo

Founded in 1999, we are a young, dynamic Dutch company based in Wieringerwerf North Holland, Cornish and Scottish owned and a global leader in power generating solutions, manufacturing turbines for the next generation of tidal energy platforms. Our employees make Tocardo what it is; we welcome employees bringing ideas, opinions and creativity into the business in order to create an open and inclusive working environment. Our workshop and office are situated nearby Medemblik, in a region where traffic jams are infrequent.

The driver for tidal stream power generation is combatting climate change by reducing the CO₂ emissions with a 100% renewable, reliable and predictable energy source. Due to the geographical limitations and specific local characteristics for successful tidal power (micro) plants, the highest value can be generated at specific locations for specific types of customers. Tidal stream power is the missing renewable energy source to create a locally-balanced power generation mix.

Key Responsibilities

- Support the development of our state-of-the-art turbine technology;
- Development of related electrical sub-systems and PLC's;
- Develop solutions to reach the lowest LCOE possible;
- Maintaining the appropriate interface between other (project) partners and the technical disciplines involved; and,
- Supporting the Engineering Manager in the delivery of overall work status reporting.

Skills and Competencies

- A university of applied sciences degree (HBO) in electrical engineering or equivalent;
- 5 to 7 years of relevant engineering experience, preferably within the renewable energy sector
- You have knowledge of PLCs and SCADA systems;
- Preferably you have got experience with FAT & SAT procedures;
- A high business standard of communication in English (verbal and written);
- Ability to take on responsibility;

Personal attributes

- Creative; able to work independently and as part of a team;
- Capable of adopting on a 'hands-on', flexible working approach;
- Commercial awareness and working to deadlines and priorities;
- Attention to detail;
- A 'can do' attitude; and,
- Willingness to travel.

Salary and benefits

- Starting salary depending on experience and proven appropriateness. This is A permanent post based on a 40-hour per week basis;
- Annual leave: 25 working days per annum.
